

Capability Statement

Flex-Weld

Division of Kelco Industries

CAGE Code:

- 87738

NAICS Codes:

- 332999 – Fabricated Metal Products
- 332912 – Hose Fittings / Fluid Components
- 336413 - Other Aircraft Parts and Auxiliary Equipment Manufacturing
- 332911 - Industrial Valve Manufacturing

COMPANY OVERVIEW

Flex-Weld is a division of Kelco Industries that designs and manufactures mission-critical welded metal bellows, expansion joints, flexible hose assemblies and custom components for U.S. aerospace and defense prime contractors. Our engineered solutions operate reliably in extreme temperature, pressure and vibration environments on airframes, propulsion systems and ground support equipment, extending service life and reducing maintenance cycles.

CORE CAPABILITIES

- Welded metal bellows & assemblies
- Expansion joints & compensators
- Expansion loops & flexible hose assemblies
- Exhaust bellows
- Piping accessories (anchors, guides, brackets)
- Custom fabrication for prototypes & low-volume specialty parts

DIFFERENTIATORS

- Trusted partner to major Department of Defense primes and Tier-1 MROs
- Decades of heritage supplying flight-critical and mission-essential assemblies
- Expertise in high-performance alloys (Inconel®, Hastelloy®, stainless steel) and advanced welding processes
- Quality management systems that meet or exceed defense and aerospace standards (ISO 9001 / AS9100)
- U.S.-based manufacturing with full ITAR compliance and complete supply chain traceability
- Rapid prototyping and low-volume specialty manufacturing to meet urgent AOG and depot requirements
- Collaborative engineering support from concept through production and fielding
